## Monitoring Network

ENR operates four state-of-the-art continuous ambient air quality monitoring stations across the NWT. Stations are located in Fort Smith, Inuvik, Norman Wells and Yellowknife. Each of these stations sample and analyze air quality on a continuous basis for a variety of parameters including dust and chemicals. The network is part of the National Air Pollution Surveillance Network (NAPS), a federal program operated across the country.

Data from our four stations is available in almost real-time to the public on the [Air Quality Monitoring Program](#) website. The site also provides information on the monitoring network, including current and historical air quality monitoring data and additional related information.

Station	Date And Time	SO <sub>2</sub>	H <sub>2</sub> S	NO <sub>x</sub>	NO <sub>2</sub>	NO	O <sub>3</sub>	CO	PM <sub>2.5</sub>	PM <sub>10</sub>
		ppb	ppb	ppb	ppb	ppb	ppb	ppm	ug/m3	ug/m3
Fort Smith	5/15/2014 3:00 PM	0.4		1.2	0.8	0.3			3.0	31.0
Inuvik	5/15/2014 3:00 PM			8.9	5.5	3.5	34.7	0.156		58.0
Norman Wells	5/15/2014 3:00 PM		0.4						0.0	39.0
Yellowknife	5/15/2014 3:00 PM	0.32		1.9	1.0	1.0	35.8	0.141	3.0	19.0

In "Current Air Quality Results", cells that are missing a value represent data determined to be invalid or below laboratory detection limits. Cells with a grey background represent sites without the selected monitor.

Reported in standard time and represents averaged data from the hour prior (i.e. 2:00pm – 3:00pm)

- Click “GNWT Stations” under the Current Air Quality tab to view real-time continuous (hourly) PM data at the Yellowknife (NAPS) station

**About**

**Login**

Select "Giant Mine" for fenceline & community station AQ data. Select "ENR" for Yellowknife NAPS AQ data

Select Station of interest: i.e. Marina1, N'Dilo 1 and Yellowknife (under ENR Owner) are hourly PM. Marina2, N'Dilo2 & Yellowknife2 are filter-based PM & metals data (24hr). Sites A-F are fenceline 15-minute PM. Roaster 2-7 are 15-minute PM.
