

N.W.T. RECYCLES COLOURING BOOKLET GRADES K – 3

Did you know that you can recycle drink containers in the N.W.T.?
That means all pop cans, juice bottles, pop bottles, juice boxes and
pouches can be returned for a refund.

When you forget to recycle, drink containers end up at your local landfill or as litter in your community.

In the recycle bin below draw 4 things you can recycle at school or at home.

By recycling you are helping to save energy. Recycling means we use less trees, oil and metal to make things. This helps protect the environment, plants and animals.

Glass bottles are made from melted sand. They will not rot like an apple core or rust like metal. Glass bottles could be taking up space in your local landfill for 1,000,000 years! Can you think of a way you could reuse a glass bottle? Draw a picture of your idea in the bubble.

Draw five things that a juice box can be made into if it is recycled.

A juice box is made from three things: paper, aluminum foil and plastic. If a juice box is recycled it can be made into new things like paper napkins, writing paper, cardboard, coat hangers, plastic flower pots and even bird feeders.

Draw your own label for a new brand of pop or juice on this recycled can.

Drink cans are made from a metal called aluminum. It takes a huge amount of energy to get aluminum out of the ground and make it into a can. It takes a lot less energy to make a new can from an old one. 6

In the bubbles draw three things that can be made from this recycled plastic bottle. Which one would be the bottle's favourite?

A recycled plastic bottle can be made into clothes, lunch bags, stuffed toys, sleeping bags, plastic pails and many more things. Imagine, the t-shirt you are wearing could be the plastic bottle you recycled last year!

Remember drink containers can now be recycled in the Northwest Territories. Put all used pop, juice and water containers in the recycling bin at school or at home. You can get a refund when you return them to a recycling depot.
