## Values At Risk Form – Instructions

**Before you submit this form, please ensure all information is completed.**

**Date:** The date you are completing the form.

**Provided By:** Your first and last name.

**Short Descriptive Name:** Provide a meaningful description that will let us know what we are looking at—for example, "Trapper Cabin on east side of Pilot Lake" or "Fishing camp 15Km up the Dog River".

**Geographic Location:** Provide the coordinates of the value AND a description. We must be able to locate the Value.

**Human Life:** Please choose between Occupied and Unoccupied.

- If there is a good chance you will be at the location between May and September, choose **Occupied**.
- If you only visit the location in the winter, choose **Unoccupied**. Please provide details regarding the frequency and duration the value is occupied in the details section or on a separate piece of paper.
- The **Non-Habitable** designation applies to VARs whose function is NOT habitation such as towers, bridges and archaeological sites. This field should be chosen for VARs in the Infrastructure category and may also apply to cultural and natural resources. These choices are less common for public use, however if you would like to report a value in this category, please feel free to do so.

**Display Category:** Choose the main category for the VAR. The term "**habitable**" as used here means: "Suitable to live in or on; habitable cabin".

- If you own the value, it is a **Habitable Structure Private**.
- If a Value has multiple purposes, choose the category for the primary purpose of the VAR.

**Region:** Select the FMD Region in which the Value at Risk is located. If you do not know, choose the region from the list below which contains the town (regional centre) closest to the VAR.

**Hazardous Material:** Identify if materials at this sight pose a danger to fire fighters or the environment. If you check this box, please provide further details in the **Additional Comments** section. Gas for personal use or household size propane tanks (around 100 pounds) are not considered hazardous.

**Collection Details for Owner of VAR:** Provide contact information for you, the owner of the value, so you can be contacted in case a fire threatens your property or if we have further questions.

**Additional comments:** Provide details regarding how often you visit the value, what hazardous materials are present (if any), the condition of the value, or any other information you would like to share with us.

**Submit the form to the regional office in which your Value at Risk is located:**

**North Slave Region**

Yellowknife, NT  
Phone (867) 767-9238  
Main Fax: (867) 873-6230

**South Slave Region**

Fort Smith, NT  
Phone (867) 872-6400  
Main Fax: (867) 872-4250

**Dehcho Region**

Fort Simpson, NT  
Phone (867) 695-7450  
Main Fax: (867) 695-2381

**Inuvik Region**

Inuvik, NT  
Phone (867) 678-6650  
Main Fax: (867) 678-6659
